

BEACON WEALTH SOLUTIONS AGGRESSIVE PORTFOLIO

AUGUST 2026

INCEPTION DATE: 06 October 2017

INVESTMENT OBJECTIVE

The Beacon Wealth Solutions Aggressive Portfolio represents a model investment strategy that seeks to grow capital and income at a moderate to high pace for investors with an investment horizon beyond seven years. It invests in a range of unit trust funds diversified across various asset classes and asset managers utilising specialist mandates. The local equity mandates target a 85% / 15% split between active and passive managed funds and a 60% / 40% split between active and passive for global equity funds. This strategy aims to achieve high capital growth over a long-term horizon and therefore has a 100% exposure to growth assets encompassing both local and international equities.

RETURN OBJECTIVE / PERFORMANCE TARGET

The investment strategy targets returns above the benchmark over rolling seven year periods.

BENCHMARK

The Beacon Wealth Solutions Aggressive Portfolio is measured against a composite benchmark consisting of 40% Capped SWIX; 10% ALPI; 40% MSCI World; 10% FTSE EPRA/NAREIT Developed Index.

REGULATION 28

This model portfolio is not compliant with Regulation 28.

PORTFOLIO FEES

Discretionary Management Fee (incl. VAT): 0.12% p.a.

Unit Trust Fund Fees: Weighted Average Total Investment Charge (TIC): 1.12%

The fees quoted on the factsheet are based on the funds available on the Old Mutual Wealth platform and could differ slightly, depending on the LISP used. The fees quoted exclude any Fund Access Fees charged by the platform

PERFORMANCE DATA*

	Performance **						
	1 Mth	3 Mths	1 Yr	3 Yrs	5 Yrs	7 Yrs	10 Yrs
Portfolio	1.75%	1.70%	11.62%	15.07%	12.11%	12.80%	10.37%
(ASISA) Wwide MA Flexible	1.31%	1.90%	7.52%	11.20%	9.55%	10.14%	8.31%
Global Flexible Composite	0.83%	1.74%	16.25%	17.53%	14.10%	13.74%	11.08%

** Returns for periods greater than 1 year are annualised

RISK STATISTICS*

Measure	Portfolio
Maximum Drawdown	-15.14%
Sharpe Ratio	0.55
Standard Deviation	10.70%

PERFORMANCE SUMMARY

* For model portfolio performance returns, both include reinvested income. All returns are calculated in ZAR net of underlying portfolio fees but gross of any discretionary fund management and investment vehicle administration fees. Client specific net returns are provided in the reports of the chosen Linked Investment Service Provider (LISP). Where life funds are held, performance is calculated based on holding of the untaxed class. In the table above, all returns prior to the inception date is based on simulated returns.

PORTFOLIO MANAGER INFORMATION

Kim Rassou has over 20 years of experience in financial services, spanning portfolio management and analysis, investment solutions, manager research, asset allocation, distribution as well as strategic initiatives. Kim holds a BCom Honours degree in Finance from the University of the Western Cape and a MBA in Finance from Stellenbosch Business School.

DIVERSIFICATION AND MANAGEMENT

As the Discretionary Fund Manager of Symmetry, our role is to carefully select and blend fund managers to build well-diversified portfolios designed to perform through changing market conditions. Each fund manager applies their expertise and judgement within their mandate, while we oversee the overall portfolio to ensure balance and alignment to your goals.

Our portfolios bring together a dynamic mix of asset classes – thoughtfully combined to create the right balance of growth and stability.

All portfolios are managed under our Category II Discretionary Fund Manager licence (held by OMLACSA). We follow Symmetry's rigorous and disciplined research process to select managers, allocate assets and construct portfolios.

As your investment partner, we continuously monitor and adjust the portfolios to stay aligned with your needs and the evolving market landscape.

PORTFOLIO COMMENTARY

Global equities were positive in August, with the MSCI All Country World Index returning 2.7% in the month. The year-to-date return was 14% at the end of August. Despite the considerable geopolitical turmoil and rising bond yields, the 12-month return in US dollars was a solid 22%.

Bond yields moved higher across developed markets during the month. The benchmark 10-year US Treasury yield increased from 4.71% to 4.79% during the month. The policy sensitive 2-year yield rose by even more, from 4.27% to 4.39%, after a hawkish speech by the Federal Reserve Chair. The Japanese 10-year yield crossed 3% for the first time since September 1996, while the UK equivalent closed the month at 5.15%, the highest level since July 2007.

Emerging market equities were also positive in August, largely due to a reversal of the semi-conductor sell-off, lifting Korea and Taiwan. The MSCI Emerging Markets Index returned 3.4% in August. Its 12-month dollar return of 38% remains well ahead of developed markets.

South African equities posted strong gains in August, led by mining shares. The FTSE/JSE All Share Index returned 4.6% in the month, pushing the 2026 return into positive territory. South African equities have enjoyed a strong run over the past year, returning 19.4%.

The resources sector gained a remarkable 26% in August as precious metals prices rebounded. The year-to-date return of 11% is somewhat more subdued. Financial shares lost 1% in the month, lowering the 2026 return to 7.2%. Industrials continue to lag, with 5.8% loss in August, dragging returns for the first eight months of the year down to 10.3%.

South African government bonds were resilient in the face of global bond weakness. The FTSE/JSE All Bond Index returned 0.7% in August, but the year-to-date return of 3.5% lags cash. The 12-month return of 16% remains well ahead of the 7% return from cash (Stefi) and inflation, however.

Local listed property was negative in August, with the FTSE/JSE All Property Index losing 4%. This means the asset class returned 2.5% in the first eight months of 2026. The 12-month return of 18.5% was largely generated in the last few months of 2025.

The rand gained 2.6% against the US dollar in August, closing at R16.14. It was 9% stronger over 12 months, detracting from global returns from the point of view of South African investors over this period.

Unit Trust Disclaimers

You should ideally see unit trusts as a medium to long term investment. The fluctuations of particular investment strategies affect how a fund performs. Your fund value may go up or down. Therefore, investment capital or return on your investment cannot be guaranteed. How a fund has performed in the past does not necessarily indicate how it will perform in the future. The fees and costs charged for managing your investment are accessible on the relevant fund's Minimum Disclosure Document (MDD) or table of fees and charges, both available on the manager's public website. Unit trusts are traded at ruling prices, may borrow to fund client disinvestments and may engage in script lending. The daily price is based on the current market value of the underlying fund's assets plus income minus expenses (NAV of the portfolio) divided by the number of units on issue. Should the underlying fund hold assets in foreign countries it may have risks regarding liquidity, the repatriation of funds, political and macro-economic situations, foreign exchange, tax, settlement, and the availability of information. Please contact us for risks specific to each country. A fund of fund is a portfolio that invests in other funds which levy their own charges, which could result in a higher fee structure for the fund of funds. The Net Asset Value to Net Asset Value figures are used for the performance calculations. The performance quoted is for a lump sum investment. The performance calculation includes income distributions prior to the deduction of taxes and distributions are reinvested on the ex-dividend date. Performances may differ as a result of actual initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Performance returns are the time-weighted return over the performance period measured. A manager has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate.
